

# VETCERT

## Consulting level - veteran tree management plan

As part of the VETcert consulting exam candidates are required to survey two veteran trees and submit a veteran tree management plan. To guide candidates during this process, it is recommended that candidates follow the structure below. This information will be provided to the candidate on the day of the exam in hard copy and in an electronic template (for the production of the plan on a computer).

- Basic Information for each tree
- Health and Vitality for each tree
- Structural Condition for each tree
- Wildlife, historical, cultural or social values of each tree
- Threats to each tree
- Management Plan for each tree
- Management justification summary
